VENTILATED STRIPS											
VENTILATED STARTER STRIP Galvanized steel ventilated strip for horizontal siding. Eliminate the need for face nails while providing easy leveling of starter course on Maibec em+® siding. Use it also with regular siding to level the starter course.  Sold in piece of 10 ft.	VENTILATED UNIVERSAL "L" STRIP Galvanized steel ventilated strip adapting to any type of installation. Sold in piece of 10 ft. 	VENTILATED "J" STRIP FOR WALL TOP Ventilated steel strip enabling siding installation for wall top and under window while meeting building codes requirements*. 10' length sold in pairs. * Available in Black and White 	VENTILATED STRIP FOR SOFFIT Ventilated strip for installing Maibec siding in soffits. The unique perforated pattern provides an opening of 9 sq. in. per linear foot, optimizing ventilation. Ideal for V-Joint and Modern profiles. Maibec ventilated strip for soffit is available in 10' length sold in pairs. ** Available in Black and White 	VENTILATED UNIVERSAL BAND 4" Galvanized steel ventilated band. Can be folded and modified on-site to meet any installation requirement. In coil of 5 bands of 10' length. 							

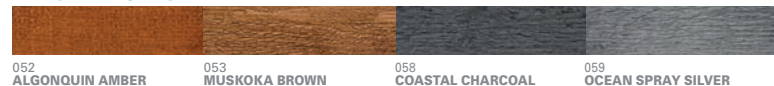

All Maibec ventilated strips are open at 50%. The perforated pattern ensures proper ventilation and drainage of the wall while preventing rodents and certain insects from getting in behind the siding.
