

Ventilated Universal Band

FINISH	ACTUAL DIMENSIONS	LENGTH	INSTALLATION
Galvanized Steel	4"	10'	Siding installed horizontally or vertically

General Specifications

Galvanized steel ventilated band. Can be folded and modified on-site to meet any installation requirement. Open at 50%, the perforated pattern ensures proper ventilation and drainage of the wall while preventing rodents and certain insects from getting in behind the siding.

Ideal for the tops and bottoms of walls and windows and for flat roofs. Protects foam insulation panels. For use in installations where the ventilated starter strip or ventilated universal "L" strip is not deep enough, such as with thicker, double-furred walls.

PACKAGING

- In coil of 5 bands of 10 ft length.

For exterior use only.
