The shingles are then cooled down and packaged. This unique system increases the durability of the product once installed.
- Low-volatile organic compounds (VOCs) water-based stains.

## Preparing the Wall for Installation

### FASTENING REFERENCE LINE

Maibec shingles feature a fastening reference line found 6 1/4" from the base of the shingle. For the 5" required shingle exposure, fasten just below the reference line to respect the installation requirement. Each individual shingle is marked on one side.

See the Maibec Shingles installation guides to know all installation requirements.

## Installation System

### STAPLES

- Stainless steel or aluminum staple with minimum 7/16" crown, minimum 16 gauge
- Two fasteners per shingle, regardless of its width

### NAILS

- Stainless steel or hot dipped galvanized
- Ring shank blunt tip nail with minimum 7/32" head
- Two fasteners per shingle, regardless of its width

## How to Calculate

### HOW TO CALCULATE THE AMOUNT OF SIDING NEEDED

Example – Area to cover: 1,000 ft<sup>2</sup>

**For 5" exposure, add 3% to the area to cover**

$$1,000 \text{ ft}^2 \times 1.03 = 1,030 \text{ ft}^2$$

$$1 \text{ box} = 25 \text{ ft}^2$$

$$1,030 \text{ ft}^2 = 41 \text{ boxes}$$
