

# Board & Batten

## TEXTURED FINISH

### INSTALLATION NAILED ON FURRING STRIPS

NOMINAL DIMENSIONS	INSTALLATION SYSTEM	FINISH	ACTUAL DIMENSIONS	OVERLAP	EXPOSED SURFACE	CONVERSION FACTOR	INSTALLATION
10"	Nailed on furring strips	Textured	5/8" x 9"	-	9 7/8"	1.24*	Vertically
2"	Nailed on furring strips	Textured	11/16" x 1 5/8"	-			

## General Specifications

### SPECIES

- Spruce - Fir (SPF) / Sound tight knot

### MANUFACTURING

- Kiln-dried (KD) between 12% to 16% humidity.
- Available in a textured finish.

### PACKAGING

- 4' to 16' random lengths in bundles. Also available in straight 10' lengths.

### AVAILABLE COLORS

Textured finish

- Selection of solid colors (2 coats).
- Maibec Natural tones.

### FACTORY-STAINING

- The stain is factory-coated on all six sides in a controlled environment for maximum stain absorption and retention. This also provides increased protection from the damaging effects of the sun and the elements.
- Low-volatile organic compounds (VOCs) water-based stains.

FSC® mixed sources certified siding available upon request.

For exterior use only.

\* TO CONVERT SQUARE FEET TO FBM, SEE THE CALCULATION METHOD UNDER THE SUPPORT TAB AT MAIBEC.COM/US

# Board & Batten

## Installation System

### FURRING STRIPS

Maibec® siding must be installed over a standard 16" on center stud built wall with OSB (Oriented Strand Board) sheathing or plywood, and an approved weather barrier. Use 1" x 4" furring strips (1" x 3" strips are acceptable). They must be kiln-dried, straight, without splits or nail holes to ensure a proper fastening base. Consult the applicable building codes in your region. See the Installation guide available on our website at [maibec.com/us](http://maibec.com/us) under the SUPPORT tab.

### NAILS

- Use Maibec 2" (3" for the batten) hot-dipped zinc galvanized ring shank nail with textured head, factory-stained to match the siding color.
- Use 2 1/2" coil nails for pneumatic nailers for siding. Make sure to check nail gun compatibility. Not color-matched.
- Use unstained stainless steel grade 316 ringed nails if installing Maibec siding in Coastal regions†.
- A plastic hammer end cap is provided to protect the wood.
- 10 lbs needed per 1,000 fbm.

## Complementary Accessories

### VENTILATED METALLIC STARTER STRIP

Installed over the furring strips. Serves as an anti-rodent barrier, provides proper ventilation and drainage to the wall. Made of galvanized steel, it comes in 10' lengths.

### METALLIC OUTSIDE AND INSIDE CORNERS

With their sleek design, our metallic outside and inside corners are the perfect finishing touch for our flat profiles and Maibec URBANH® brushed-face finish siding. Made of aluminum, they come in 10' lengths.

## How to Calculate

To calculate the amount of siding needed consult the Support/Installation guide tab at [maibec.com/us](http://maibec.com/us). Add 3% for losses due to cutting.
