## Installation System

### NAILS

- Use Maibec 2" hot-dipped zinc galvanized or stainless steel flat textured head ring shank nails that are corrosion resistant and colour-matched to the siding or for the first and last course.
- A plastic hammer end cap is provided to protect the wood.
- 10 lbs needed per 1,000 fbm.

For the Îles-de-la-Madeleine and coastal regions†, see the Installation guide available on our website at [maibec.com](http://maibec.com) under the SUPPORT tab.

## Installation

Maibec® siding must be installed over a standard 16" (406 mm) on centre stud built wall with OSB (Oriented Strand Board) sheathing or plywood, and an approved breather membrane. Use 1" x 3" (25 x 76 mm) furring strips. They must be kiln-dried, straight, without splits

or nail holes to ensure a proper fastening base. Consult the building codes applicable in your region. See the Installation guide available on our website at [maibec.com](http://maibec.com) under the SUPPORT tab.

## Complementary accessories

### METAL OUTSIDE CORNER

With its sleek design, our metal outside corner is the perfect finishing touch for the Maibec URBANH™ Series. Made of aluminium, it comes in 10' lengths.

### METALLIC STARTER TRIMS

Stainless steel vent trim installed over the strapping. Serves as an anti-rodent barrier, provides proper ventilation to the wall while also eliminating the use of nails on the starter course of Maibec em+® siding. Can also be used with regular siding. Comes in 10' lengths.
