

# Maibec Ventilated Universal Band 4"

FINISH	ACTUAL DIMENSIONS	LENGTH	INSTALLATION
Galvanized steel	4"	10'	Horizontally

## General Specifications

Galvanized steel ventilated 4" foldable band for horizontal or vertical siding. Enable field modifications in order to meet any installation requirements when ventilation and drainage is required while preventing insects or rodents from penetrating behind the wall.

Use it for top or bottom of the walls, flat roofs and under or above windows. Protect rigid isolation panels or for thicker walls when ventilated starter strips or Maibec ventilated universal "L" strip are not deep enough. Use it for top or bottom of the walls, flat roofs and under or above windows.

### PACKAGING

- In coil of 5 bands of 10 ft. (3,05 m) length.

For exterior use only.
