"H" JOINT MOULDING												
Aluminum H-joint moulding is used to hide the gap between two runs of lap siding. The H-joint moulding has a textured finish and comes painted, ready to be installed. 							101	209	210	255	009	223
Sold in piece of 6" for the trends program colours.												
SEALANT												
One tube of sealant covers 25 linear feet (1/4" x 1/4" bead). For residential constructions, plan for 12 tubes per 1,000 ft ² of Maibec Resistech™ siding. This ratio is a guideline and may vary based on the building architecture. Please be sure to have enough sealant for your project. Sealant is sold without warranty and is only available for colours in our Trends Program.							101	209	210	255	009	223
VENTILATED STRIPS												
VENTILATED STARTER STRIP  Galvanized steel ventilated strip. Use it to easily level the starter course and give the right starting angle. Sold in piece of 10 ft.	VENTILATED UNIVERSAL "L" STRIP  Galvanized steel ventilated strip adapting to any type of installation. Sold in piece of 10 ft.	VENTILATED "J" STRIP FOR WALL TOP  Ventilated steel strip enabling siding installation for wall top and under window while meeting building codes requirements*. 10' length sold in pairs. * Available in Black and White	VENTILATED UNIVERSAL BAND 4"  Galvanized steel ventilated band. Can be folded and modified on-site to meet any installation requirement. In coil of 5 bands of 10' length.									

All ventilated and drainage accessories are open at 50%. The perforated pattern ensures proper ventilation and drainage of the wall while preventing rodents and certain insects from getting in behind the siding.
